Frontend Engineer

Description

This is a full-time hybrid role for a Backend Developer at Poterby Tech in Lagos, with flexibility for some remote work. The Backend Developer will be responsible for developing and implementing user-facing features, ensuring the technical feasibility of UI/UX designs, optimizing applications for maximum speed and scalability, and collaborating with back-end developers and web designers.

Responsibilities

- Design, develop, and maintain robust, scalable, and secure server-side applications.
- Build and manage APIs and integrations with internal and third-party services.
- Optimize application performance for speed and scalability.
- Ensure data protection and implement best practices for security.
- Collaborate with front-end developers to integrate user-facing elements.
- Manage and maintain databases, ensuring data consistency and reliability.
- Participate in code reviews, testing, and deployment processes.
- Troubleshoot and debug production issues to ensure system stability.
- Contribute to technical documentation and development standards.

Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent practical experience) is a plus.
- Proven experience as a Backend Developer or similar role.
- Strong proficiency in one or more backend technologies such as **Node.js**, **Python (Django/Flask)**, or **PHP (Laravel)**.
- Experience working with databases like **MongoDB**, **MySQL**, or **PostgreSQL**.
- Solid understanding of **RESTful APIs**, **microservices architecture**, and **cloud platforms** (e.g., AWS, Google Cloud, or Azure).
- Familiarity with version control systems such as **Git**.
- Good understanding of DevOps tools and CI/CD pipelines is a plus.
- Strong problem-solving skills and attention to detail.
